## Construction Notice

### Mannakee Street Sidewalk Martins Lane To Smallwood Road

#### **Sidewalk Construction**

The City of Rockville has received requests from residents to construct sidewalks where they are missing. These requests support the City's goal to enhance pedestrian accessibility and to create a safer route for students walking to and from school.

To address a request from the Woodley Gardens West Civic Association, the City of Rockville plans to install a sidewalk along the east side of Mannakee Street, between Martins Lane and Smallwood Road. In addition to constructing this five-foot wide concrete sidewalk, the project will include a 15-foot wide grass buffer between the new sidewalk and the road. The existing row of cherry trees will be preserved; however, the City forester has identified two for removal. Please refer to the map illustrating the identified trees and proposed sidewalk on the back of this page. Weather permitting, construction will begin during the week of November 10 and will continue for approximately one week.

#### **Project History**

The Woodley Gardens West Civic Association initially submitted a request for construction of this project last November, to improve pedestrian circulation. Due to its proximity to Beall Elementary School, the City designated this missing link a priority installation project under the national Safe Routes to School grant.
